DAY 10: Montreal to Toronto

Enjoy breakfast in our hotel this morning, before we depart for the airport and your return flight back to Pearson International Airport. (B)

Cruise North to Baffin Island

A unique and once in a lifetime experience!

DAY 1: Toronto to Montreal

Complimentary shuttles to Pearson Airport are included, before a casual afternoon flight to Montreal. Here we shuttle to the Airport area hotel, so that we are ready for our full day tomorrow.

DAY 2: Kuujjuaq, Nunavik

Enjoy breakfast in your hotel this morning before departing for the airport. Today we fly "First Air" to Kuujjuaq, a name that means "Great River" in Inuktitut, the language of the Inuit. After a brief tour of the town and buffet lunch, we transfer to the "Lyubov Orlova", our ship. This new renovated cruise ship awaits our arrival as we prepare for the high tide that will carry us down the river to the vast expanse of Arctic tundra and open sea. The routing for this cruise will vary in order, to meet the needs of our customers and wind current. Among the places we may visit are:

- **Akpatok Island**

Starting each morning, for the next 6 days, with breakfast on our vessel, we will then be prepared to meet each day's new adventures. We spend these days exploring the Arctic land and seascape. Today we start with Akpatok Island, a favorite summering ground for polar bears and penguin-like thick billed murre, the island has been designated by the Canadian Wildlife Service as a special protection site. We cruise the base of 800ft sheer cliffs and marvel at the abundance of wildlife. We recommend that you bring rubber boots, good hiking boots and water resistant pants. (B,L,D)

- **Killiniq and the Button Islands**

At the northern tip of Labrador we find a rugged, isolated world and a mecca for marine mammals. We take the zodiacs to explore the coastline, or hike across the

stunning tundra landscape. Dressing in layers and carrying a backpack equipped with extra clothing, bottled water, and bug repellent is a suggestion that we recommend to all passengers. (B,L,D)

- **Monumental Island**

A favorite haul-out for walrus, and polar bears are known to frequent the small rocky island with outlying islets, a great location to patrol for their next meal.

- **Kekerten Territorial Historic Park & Auyuittuq National Park**

Auyuittuk Nation Park is an amazing wilderness of mountain peaks, treeless valleys and glacial rivers, crowned by the Penn Ice Cap, a remnant of the last Ice Age. We may spend a short Arctic night anchored by the rocky walls of the Pangnirtung Fiord, a traditional home of the Inuit for more than 1,000 years where there is still a thriving community of artists. To night we linger under the midnight sun and enjoying a BBQ party on deck. (B,L,D)

- **Pangnirtung**

The village of Pangnirtung – known as Pang to the locals – is the gateway to Auyuittuq National Park. This is the traditional home of the Inuit for more than 1,000 years where there is still a thriving community of artists renowned world wide for their weaving and printmaking.

DAY 9: Iqaluit

Catching the excitement as we sail up the storied Frobisher Bay to dock just outside Iqaluit! Today we prepare for our journey home, enriched by the many wonderful memories of our northern adventure. Our First Air flight leaves in the late afternoon and arrives back in Montreal in the early evening.
